A results-driven ServiceNow Developer with 3 years of hands-on experience architecting and delivering enterprise-grade solutions on the ServiceNow platform. Holding 3 ServiceNow certifications (CSA, CAD & CIS-DF), currently at Flex Ltd., with deep expertise in ITSM, Orchestration, CMDB/CSDM, MID Server, and Identity Management. Proven track record in designing reusable frameworks for AD integration, SSO, Auto-Assignment, and On-Demand Admin Access. Experienced in end-to-end eBonding, LDAP/LDAPS management, and driving global platform automation initiatives at scale.

Skills

ServiceNow • ITSM • Orchestration • CMDB • CSDM • Integration Hub • Flow Designer • MID Server
LDAP/LDAPS • Active Directory • SSO • JavaScript • Node.js • REST API • Firebase • Fluent
Python • MySQL • NoSQL • Linux • Azure • AWS • Docker • Git

Experience

ServiceNow Developer *Flex Ltd.*

10/07/2023 - Present

Summary Architected and delivered end-to-end ServiceNow solutions with full ownership across Orchestration, MID Server management, and enterprise integrations. Designed reusable frameworks for AD integration, Auto-Assignment, and eBonding, while implementing SSO and completing LDAP-to-LDAPS migration for SOX compliance. Developed production-grade custom applications and contributed to a global initiative to simplify and scale Orchestration governance across environments.

Key Responsibilities

- Built a **reusable Orchestration framework** supporting bulk modification of 100+ automations, ensuring zero-downtime integrity during data center migrations and infrastructure changes.
- Designed and delivered an **end-to-end eBonding integration**, enabling bi-directional ticket synchronization between ServiceNow and 2 external ITSM platforms.
- Led **LDAP-to-LDAPS migration** across 5+ enterprise directory servers, securing directory service communication and achieving full SOX compliance.
- Developed a **scalable Active Directory integration solution** for SubProd AD environments, enabling repeatable AD connectivity across multiple ServiceNow instances.
- Configured and managed **MID Servers** to route integrations and Orchestration activities securely across network zones, supporting 10+ production workflows.
- Implemented **SSO via Okta** for 10,000+ users, streamlining authentication and eliminating manual identity provisioning across enterprise environments.
- Built an **On-Demand Admin Access** application in ServiceNow, enabling controlled, time-bound privilege elevation with automated approval workflows and a full audit trail.
- Designed an **intelligent Auto-Assignment engine** with rule-based ticket routing, reducing manual triage across 20+ assignment groups.
- Contributed to a **global Orchestration simplification initiative**, streamlining governance and reducing maintenance overhead across 3+ regional environments.
- Developed and customized ServiceNow applications to enhance IT operations, identifying and resolving critical platform bugs to improve system uptime.

Tech Stack ServiceNow, JavaScript, ITSM, Orchestration, Integration Hub, MID Server, LDAP/LDAPS, Active Directory, SSO, REST API, CMDB, CSDM, Workspace

Internship

ServiceNow Developer Intern *Flex Ltd.*

01/02/2023 - 30/06/2023

Summary

Enhanced technical expertise in ServiceNow by contributing to the ITSM module, developing skills in platform management, and applying development best practices.

Key Responsibilities

- Assisted in ServiceNow development tasks, focusing on functionality enhancements and platform stability.
- Supported platform administration, ensuring seamless operation and efficient service delivery.
- Identified and resolved system bugs, reducing incident response time.

Tech Stack

ServiceNow, ITSM, JavaScript

Education

Bachelor of Technology (B.Tech) in Computer Engineering *Ajeenkya DY Patil University, Pune*

08/2019 - 05/2023

- Completed B.Tech in Computer Engineering with specialization in Information Systems.
- Completed 320 hours of hands-on technical workshops covering HTML5, CSS3, JavaScript, React, REST APIs, and more.
- Proficient in Git, SCRUM methodologies, and developing responsive web applications.

Certifications

CIS - Data Foundations

05/2026

- Credential issued by ServiceNow.

Certified Application Developer

02/2026

- Credential issued by ServiceNow.

Certified System Administrator

03/2025

- Credential issued by ServiceNow.

Projects

SN-MCP-Server

04/2026

- Developed and published a read-only Model Context Protocol (MCP) server for ServiceNow to NPM, enabling AI tools like Claude and VS Code to query multiple instances securely.
- Integrated Code Search, Table API, and Aggregate API to provide deep visibility into Script Includes, Flow Designer artifacts, and CMDB records.
- GitHub: [ImJaineel/SN-MCP-Server](#)
- NPM: [@imjaineel-dev/sn-mcp-server](#)

On-Demand Admin Access

- Built a ServiceNow custom application enabling secure, time-bound admin privilege elevation with approval workflows and full audit logging.
- GitHub: [ImJaineel/On-Demand-Admin-Access](#)

Auto-Assignment

- Designed a rule-based Auto-Assignment engine for intelligent ticket routing across assignment groups and teams.
- GitHub: [ImJaineel/Auto-Assignment](#)
